

Dear GLOBALG.A.P. Scheme Manager,

The GLOBALG.A.P. Board has decided that the GGN label may only be used for products originating from producers with full GRASP compliance starting 30 June 2019.

As you are aware, GLOBALG.A.P. launched the **GGN label** for Aquaculture in 2016. GLOBALG.A.P. expects an elevated level of integrity from farms that supply GGN labelled products, and therefore, a "fully compliant" GRASP overall compliance level will be required.

From 1 July 2019, only producers with IFA Aquaculture certification and with a fully compliant GRASP assessment can supply GGN label license holders for GGN labelled products.

Please ensure that all your IFA Aquaculture certificate holders and CoC certificate holders are duly informed.

In addition, the GGN label office will inform all GGN label licensees individually.

To receive access to the database as a market participant, please contact customer_support@globalgap.org. All other questions can be referred to info@ggn.org.

Best regards,

Anne Kafzyk
